

Serve Up an Odor-Free Dining Experience for Your Guests

Customers choose their favorite restaurants as much for the atmosphere as they do for the food. But if there's a lingering odor from burnt food – or worse – forget about staying number one on any foodie's list. Fresh Wave® IAQ is the perfect odor solution for food service: Smell is so innately tied to taste, and Fresh Wave IAQ uses no masking chemicals that could potentially dull taste buds. Combined with the moral requirement to use a non-toxic solution anywhere food is involved, there exists no better option than Fresh Wave IAQ.

Fresh Wave IAQ is free of harmful VOCs harsh and flammable chemicals and is recognized for safer chemistry by the Environmental Protection Agency's "Safer Choice" program.

Problem:

Ongoing odors from cooking, cigar and cigarette smoke, bathrooms, grease traps, sewage, dumpster areas and compactor rooms.

Solution:

Fresh Wave IAQ products to eliminate odors, not mask them.

Business Benefit:

Neither new nor repeat patrons will choose an eating establishment with lingering odor issues.

WHAT MAKES FRESH WAVE IAQ DIFFERENT?

- Eliminates Odor – Not a “masking agent”; contains no irritating fragrances.
- Broad Spectrum – Works on virtually every odor.
- Multiple Solutions – Provides delivery methods to address every odor issue.
- Safe – MSDS reads like water.
- HMIS Classifications: Health – 0, Flammability – 0, Reactivity – 0, Protective Equipment – NONE.
- Green – Recognized for safer chemistry by the EPA’s “Safer Choice” program.

Our Science

WHAT IS FRESH WAVE IAQ?

- A proprietary blend of naturally occurring plant extracts, non-ionic food-grade surfactants and purified water

Natural
Ingredients

Water

Lime

Pine Needles

Aniseed

Clove

Cedarwood

HOW DOES IT WORK WITHOUT USING “MASKING AGENTS”?

1. Contact/Absorption – Fresh Wave IAQ molecules released into the air or applied to surfaces make contact with odor molecules via opposing electrostatic charges and random contact.
2. Solubility – Fresh Wave IAQ’s formulation enhances the solubility of gases (all odors are gases).
3. Absorption – Enhanced solubility of the gas leads to absorption of the odor gas.
4. Chemical Reaction – Fresh Wave IAQ modifies the odor molecule to a non-odorous state so that the odor can no longer be detected by the human olfactory system.
5. Biodegradation – Food for bacteria.

THE ODOR IS GONE AND WILL NOT RETURN.

IS IT SAFE?

- Flash Point – None
- Tox Data – Non-toxic, per EPA guidelines
- VOC Data – No hazardous VOCs
- Ecological – Does not bioaccumulate

AIR & SURFACE LIQUID AND SPRAY

A rapid and targeted method of odor elimination. Instantly bonds to and eliminates odor molecules. The Air & Surface Liquid and Spray have an initial mild aroma that quickly dissipates. Objective? The absence of odor or annoying fragrance. Advantage? Eliminate "lost" revenues from patrons who question the cleanliness of a facility that does not smell fresh. Get the space up to facility standards in short order.

Ideal For:

- Customer Waiting Areas, Hostess Stations, Kitchens
- Maintenance Carts:
 - Have a 32-ounce sprayer ready when needed.
- Housekeeping:
 - Have a 1-gallon liquid container ready for use as an additive in mop buckets and wash buckets. Use to deodorize smelly mop heads.
- Restrooms:
 - Use the 1-gallon size to add to a mop bucket. Flush into odorous drains. Mop and penetrate grout in older restrooms.
- Cooking Odors:
 - Curry, garlic and exotic spices.
- Large Spaces:
 - Use an M130 Vapor Phase Unit to deliver Air & Surface Liquid. This solution is ideal for use in the area surrounding a grease trap while it is being pumped.

GEL

A passive, continuous-release formulation that works around the clock to provide constant odor elimination, day or night. The Gel has an initial mild aroma that quickly dissipates.

Ideal for:

- Food Prep Areas, Kitchens, Restrooms, Customer Waiting Areas, Janitorial
- Closets:
 - Place an 8-ounce Gel in the space impacted by the odor. Use a Gel Wall Mount Unit where appropriate.
 - Covers approximately 250 square feet for 30 days.
 - Refill with the 2- or 5-gallon pail. Save approximately 47% per 8 ounces.

32oz Spray Gel

1.3Gal Spray Gel

SPRAY GEL

For immediate, targeted odor elimination, spray Fresh Wave IAQ Spray Gel onto the trash, refuse or compost area to completely cover the source of the odor. This is a topical application. Apply as needed evenly and thoroughly to fully cover the odorous materials. The Spray Gel is designed to allow odorous gases to pass through a barrier of sticky Gel. Upon passing through the Gel layer, the odorous gases are eliminated.

Ideal for:

- Food Waste Dumpsters and Trash Compactors
 - Odorous Waste Receptacles
 - Composting Bins or Receptacles
- Apply with the 32-ounce trigger sprayer in smaller applications. For larger applications, apply with a handheld pump-up sprayer, backpack sprayer or airless sprayer. Use a fan or wave tip.

12oz Shake

1Gal Carpet & Upholstery Additive

5Gal Carpet & Upholstery Additive

CARPET & UPHOLSTERY ADDITIVE & SHAKE

Penetrates deep into pile and fabric weave to bond with and eliminate even the most embedded odors, including must, mildew, urine, feces, perspiration and vomit.

Ideal For:

- Hot Water Extraction (HWE) and Bonnet Cleaning
- Use in pre-spray, hot water rinse/extraction and/or post-spray using a Hudson sprayer. Apply to fabric using a wash bucket and scrub brush.

150 Pearl Packs

1Gal Laundry Additive

5Gal Laundry Additive

PEARL PACKS & VACUUM PEARLS

Vacuums are an essential cleaning tool, but the odors that linger in carpets and upholstery get sucked up by vacuums and blown out as exhaust. Patrons will be annoyed by this “stale and unpleasant” odor. This is one more way to provide your patrons with the absence of odor when they arrive in your foodservice facility.

- Each pack and scoop can last up to 30 days.

Ideal For:

- Bagless Vacuums:
 - Set 1 Pearl Pack atop the filter in the vacuum cleaner.
- Vacuums with Bags:
 - Pour 1 scoop of Vacuum Pearls directly into the vacuum cleaner bag.

Available in	Item Number
VacPacks (30 Packs)	578-6
VacPacks (150 Packs)	579
VacPearls (70 Scoops)	583-6
VacPearls (280 Scoops)	582

LAUNDRY ADDITIVE LIQUID

Many commercial detergents are designed to remove dirt and stains but fail to adequately address odor issues. Use the Laundry Additive in addition to detergent to eliminate odors from problem laundry, including must, mildew, urine, feces, vomit and perspiration. Advantage? Expense reduction: Only one wash cycle will be required, resulting in the use of less water, less energy and, most importantly, less labor.

Ideal For:

- Uniforms, Microfibers, Linens and Mop Heads

M130 Vapor Phase Unit
(mobile)

S130 Vapor Phase Unit
(stationary)

130 CFM VAPOR PHASE UNIT – Mobile (M130) & Stationary (S130)

The Vapor Phase Unit delivery system was developed to provide a “dry” dispersion method for the efficient and economical application of Fresh Wave IAQ Air & Surface Liquid odor eliminator. The Unit disburses sub-micron size Fresh Wave IAQ particles:

- The smaller the droplet, the greater degree of penetration into drapes, ceiling tiles, carpet as well as cracks and crevices.
- The smaller the droplets, the more surface area there is to make contact with and eliminate the odor in the air and on surfaces.

The Unit dispenses 5,000 cubic feet of vapor per hour, quickly overwhelming larger spaces, penetrating every pore, crack and crevice. A safe alternative to using potentially harmful ozone generators. Advantage? Eliminate “lost” revenues. Get your foodservice facility back up to your standards in short order.

Mobile Unit Ideal For:

- Restaurants
- Cafeterias
- Meeting and Event Rooms
- Food Waste Dumpsters

Stationary Unit Ideal For:

- Dumpster and Compactor Rooms
