

Fresh Wave® IAQ Vacuum Packs and Pearls are targeted, natural, non-toxic, and environmentally friendly odor problem solvers used to eliminate odors from vacuum cleaner exhaust. Safe to use around guests, residents, patients and employees, these pearls get the job done without using caustic chemicals or scented masking agents.

APPLICATIONS:

Vacuums are an essential cleaning tool, but the odors that linger in carpets and upholstery absorbed by vacuums create odorous exhaust. Guests, residents and employees can be annoyed by this unpleasant, dusty odor, choosing less odorous facilities to visit or reside in. Fresh Wave® IAQ Vacuum Packs and Pearls will eliminate odor from the vacuum cleaner exhaust, leaving the space being vacuumed free of odor and annoying scented masking agents. Both help to keep the vacuum smelling fresh between uses.

DELIVERY:

Choose the right Fresh Wave® IAQ Vacuum Pack or Pearl product for your commercial vacuum cleaner.

- For a bagless vacuum, set 1 Pearl Pack adjacent to the filter in the vacuum cleaner. Use more or less depending on the severity of the odor.
- For a vacuum with a bag, pour 1 scoop of Vacuum Pearls directly into the vacuum cleaner bag. Use more or less depending on the severity of the odor.
- Each pack and scoop can last up to 30 days.

IDEAL FOR:

Anywhere there is carpet, including:

- Hotel, Resort, or Time Share Rooms
- Meeting Rooms
- Acute Care Facilities
- Long-Term Care Facilities
- Offices
- Cafeterias
- Classrooms
